

- When was the last time you had your well water tested?
- Have you noticed any changes in the odor, taste, color, or clarity of your water?
- Do you know of any wells near you that are not being used?
- Are there any sinkholes near your well?

If you are interested in having your well water tested or have any concerns regarding your well, you may contact the following departments for more information:

|                                                     |              |
