A Wisconsin nutrient management plan must be based on soil tests conducted at the soil testing laboratory certified by the Department of Agriculture, Trade and Consumer Protection. This requirement ensures soil test results and recommendations will be generated through analytical procedures approved by the University of Wisconsin with consistent results. Laboratories must perform with a certain level of success, to remain certified. The following is a list of soil testing laboratories certified by the Wisconsin DATCP. If you have any questions about this program please contact Sue Porter at the Wisconsin DATCP (608-224-4605).						
*Have your CCA Agronomist write your Nutrient Management Plan using Snap-Plus software, which includes soil loss calculations for conservation plan compliance.						

This list may not be all inclusive.
To be added or removed, please call (920) 386-3660.
