RE: Dodge County American Rescue Plan Act Allocation

Dear County Board Supervisors:

The Lebanon Town Board is requesting consideration of Municipal Funds for the following Lebanon project:

Project Description: Town of Lebanon – Town Shop – Replacement of Septic System Project

Project Timeline: 2023 to 2024

Project Funding:

- Septic System and Holding Tank Installation - Estimated Costs of \$35,000.00
 - Mound System for Restroom Facilities - \$20,000.00
 - Holding Tank for Drain Water - \$12,000.00
 - Miscellaneous Expenses (Soil Testing, Design Plan) - \$3,000.00
- Municipality Current Investment - \$35,489.82
 - Surveys - \$2,375.35
 - Land Purchase - \$29,114.47
 - Legal - \$4,000

Project Summary:

The Town of Lebanon is developing a plan to replace the 1962 septic system at the Town Shop on County Road R and O. The existing system lies in the County Road O right-of-way, and the leach bed extends under the current road base of County Road O. In addition, the Town needs to comply with current rules and regulations pertaining to drain water from the truck bay area. The water from the bay area cannot be drained into a septic system. Therefore, an additional holding tank is required to be installed.

Project Problem/Need:

The Town of Lebanon was informed at the last septic inspection that a system replacement should be planned for in the near future. The septic system is not only used by town employees, but by the public during annual rabies clinics, weekly garbage/recycling drop-off and other public activities. The Town is concerned with the deteriorating system that it does not contaminate neighboring private wells owned by landowners, a business, and a public school. The elementary public school, with a student population of approximately 65, is the closest facility to the town shop. The Town has purchased 2.0 acres of land, but the Town does not have sufficient funds to install the system at this time. The funds would assist in replacing the deteriorating system sooner because at this time the Town does not have sufficient funds to replace the system.

Project Implementation/Feasibility:

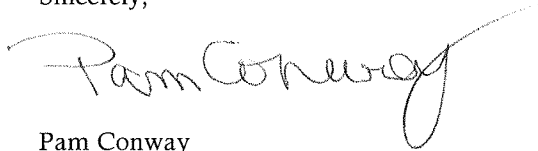

The system can be installed at any time after the septic plan and permit have been approved. Also, the Town of Lebanon has purchased approximately 2.0 acres land to install the septic system.

Project Outcome/Objectives:

The up-to-dated system will alleviate any possible risk of contaminating any surrounding wells and groundwater. Upon completion the septic system will be inspected every three years.

This project will meet the ARPA Funds under the Sanitary Sewer and Water infrastructure.

Sincerely,

A handwritten signature in cursive script that reads "Pam Conway". The signature is written in dark ink and is positioned above the printed name and title.
