EXTERNAL EMAIL: Verify sender before opening links and attachments.

I know the deadline was Friday, but please consider including our request for ARPA funds.

Thank you for your consideration.

Sincerely,
Kim Tennyson

Dead Creek Bridge replacement

Scheduled for 2025

The total estimated project cost is \$528,700

Federal/State funding \$416,224

Town of Hustisford funds \$112,476

The summary of costs does not include any real estate acquisitions which is unknown at this time, design costs which could be as much as \$50,000 or the \$7,920 state review expense. ARPA funds would be utilized to offset the cost of the design and the Town of Hustisford's portion of the construction costs. St. Helena Road and the Dead Creek Bridge is a very heavily traveled between Horicon and Hwy 60 in Hustisford by farmers, commuters and local residents. Although the project is already approved, receiving an additional allocation of funds from the County ARPA would relieve the Town of Hustisford from deferring funds allocated to maintaining our already deteriorating roads to fund the reconstruction of the Dead Creek Bridge.
